THE TREASURY OF HUMAN INHERITANCE

ISSUED BY

THE FRANCIS GALTON LABORATORY FOR NATIONAL EUGENICS

The Francis Galton Laboratory is issuing in parts at short intervals a collection of published and unpublished family pedigrees, illustrating the inheritance in man of mental and physical characters, of disease and of abnormality.

Students of heredity find great difficulty in obtaining easy access to material bearing on human inheritance. The published material is voluminous, scattered over a wide and often very inaccessible journalistic area. The already collected although unpublished material is probably as copious, but no central organ for its rapid publication in a standardized form exists at present. The Eugenics Laboratory alone possesses several hundred pedigrees of family characteristics and diseases which it is desirable to make readily accessible. Many medical men possess similar material, and there is a growing desire among genealogists to pay more attention to family characters and supplement the merely nominal pedigrees current in the past.

For a publication of this kind to be successful at the present time, it should be entirely free from controversial matter. The *Treasury of Human Inheritance* will therefore contain no reference to theoretical opinions. It will give in a standardized form the pedigree of each stock. This will be accompanied by a few pages of text describing the individual members of the stock, giving references to authorities, and, if the material has been published, to the *locus* of original publication. When necessary the characteristic will be illustrated by photography or radiography. In this way, it is hoped in the course of a few years to place a large mass of material in the hands of the student of human heredity. It will not cut him off from, but directly guide him to original and fuller sources of information. Further, the *Treasury* will provide students of eugenics and of sociology, medical men, and others, with an organ where their investigations will find ready publication, and where as time goes on a higher and more complete standard of family history than has hitherto been usual can be maintained. It is proposed to issue the *Treasury of Human Inheritance* in quarto parts at about quarterly intervals. Each part will contain about 6 to 10 plates of pedigrees and of such other illustrations as may be needful.

The following parts have already been issued:—

Parts I and II (double part) contains pedigrees of Diabetes Insipidus, Split-Foot, Polydactylism, Brachydactylism, Tuberculosis, Deaf-Mutism, and Legal Ability. Price 14*s.*

Part III contains pedigrees of Angioneurotic Oedema, Hermaphroditism, Deaf-Mutism, Insanity, and Commercial Ability. Price 6*s.*

Part IV contains pedigrees of Hare-Lip, Cleft Palate, Deaf-Mutism, and Congenital Cataract. Price 10*s.*

Parts V and VI (double part) contains pedigrees of Haemophilia. Price 15*s. net.*

Part VII will be ready shortly and will contain pedigrees of Dwarfs.

The subscription to each set of four parts is 24*s.*, and all communications with regard to pedigree contributions should be sent to: The Editors, *Treasury of Human Inheritance*, Eugenics Laboratory, University College, London, W.C. Subscriptions should be made payable to Miss Ethel M. Elderton, at the above address.

Single parts , W., either directly or

Studies in National Deterioration.

I. On the Relation of Fertility in Man to Social Status, and on the changes in this Relation that have taken place in the last 50 years. By DAVID HERON, M.A. *Issued.* Price 3*s. net.*

II. A First Study of the Statistics of Pulmonary Tuberculosis: Inheritance. By KARL PEARSON, F.R.S. *Issued.* Price 3*s. net.*

III. A Second Study of the Statistics of Pulmonary Tuberculosis: Marital Infection. By the late E. G. POPE. Edited and revised by KARL PEARSON, F.R.S. with an Appendix on Assortive Mating from Data reduced by ETHEL M. ELDERTON. *Issued.* Price 3*s. net.*

IV. The Health of the School-Child in relation to its Mental Characters. By KARL PEARSON, F.R.S. *Shortly.*

V. On the Inheritance of the Diatheses of Phthisis and Insanity. A Statistical Study based upon the Family History of 1500 Criminals. By CHARLES GORING, M.D., B.Sc. *Issued.* Price 3*s. net.*

VI. A Third Study of the Statistics of Pulmonary Tuberculosis: The Mortality of the Tuberculous and Sanatorium Treatment. By W. PALIN ELDERTON, F.I.A. and S. J. PERRY, A.I.A. *Issued.* Price 3*s. net.*

Technical Series.

I. On the Theory of Stresses in Crane and Coupling Hooks, with Experimental Comparison with Existing Theory. By E. S. ANDREWS, B.Sc., with some assistance from KARL PEARSON, F.R.S. 1904. 4to, with 13 diagrams. Price 3*s. net.*

II. On some Disregarded Points in the Stability of Masonry Dams. By L. W. ATCHERLEY, with some assistance from KARL PEARSON, F.R.S. 1904. 4to, with 1 figure in the text and 3 plates. Price 3*s.* 6*d. net.*

III. On the Graphics of Metal Arches, with special reference to the relative strength of two-pivoted, three-pivoted, and built-in Metal Arches. By L. W. ATCHERLEY and KARL PEARSON, F.R.S. 1905. 4to, with 3 plates. Price 5*s. net.*

IV. On Torsional Vibrations in Shafting. By KARL PEARSON, F.R.S. 1905. With 13 tables and plates. Price 6*s. net.*

V. An Experimental Study of the Stresses in Masonry Dams. By KARL PEARSON, F.R.S., and A. F. CAMPBELL POLLARD, assisted by C. W. WHEEN and L. F. RICHARDSON. 1907. 4to, with 9 figures in the text and 11 plates. Price 7*s. net.*

VI. On a Practical Theory of Elliptic and Pseudo-Elliptic Arches, with special reference to the Ideal Masonry Arch. By KARL PEARSON, F.R.S., W. D. REYNOLDS, B.Sc. (Eng.) and W. F. STANTON, B.Sc. (Eng.). 1909. 4to, with 6 plates. Price 4*s. net.*
